

CASE STUDY

STATEN ISLAND PPS

EXECUTIVE SUMMARY

Staten Island Performing Provider System (SI PPS) is comprised of nearly 1,000 medical and behavioral health providers and community-based organizations.

As part of the DSRIP Medicaid Transformation Program, it oversees the implementation of 11 strategic initiatives to reduce costs and improve population health for an estimated 180,000 Staten Island Medicaid members.

CHALLENGE

Architect a system and processes to drive a 25% reduction in avoidable hospital use over a five-year period.

SOLUTION

The SpectraMedix Platform, including turnkey IT infrastructure, data management, predictive modeling, population health analytics and performance reporting.

RESULTS

SIPPS was a standout as New York's top performer in the DSRIP program. Results included:

62% reduction in preventable ED visits	\$15M savings
61% reduction in preventable behavioral health ED visits	\$6.2M savings
52% reduction in preventable readmissions	\$6.5M savings
68% reduction in hospitalizations for diabetes complications	\$12M savings

"We recognized that identifying a partner to create a business intelligence platform was very important. We found a great partner in SpectraMedix. And the NYDOH recognized that their partnership was important in helping us to transform care delivery."
