

PAYER CHALLENGES, SPECTRAMEDIX SOLUTIONS: VALUE-BASED PAYMENT MODELS

Payers face a wide variety of challenges in supporting their market-network leaders and providers in value-based payment models. Here are eight of the biggest pain points payers struggle with and how SpectraMedix enables you to overcome them.

1. SILOED DATA

Problem: Healthcare data is often siloed across the enterprise.

Solution: The SpectraMedix Platform provides advanced data aggregation and integration capabilities, including monthly data validation and data quality reports to ensure that gaps are identified and data can be trusted.

2. SILOED ANALYTICS

Problem: Siloed risk, cost, utilization, and network leakage analytics.

Solution: The SpectraMedix VBP Analytics Suite supports payers and providers with over 120 pre-configured, interactive analytics reports to manage performance on key value levers that impact value-based programs and contracts.

3. CONTRACT MODELING

Problem: Payers and providers need transparency from each other to reach their goals within their value-based contracts.

Solution: The VBP Contract Modeler provides a unique solution to begin value-based contracts with providers, standardize workflows, and collaborate to bring providers into value-based arrangements.

4. TRACKING AND MANAGEMENT

Problem: Providers need an effective way to properly track and manage their performance within value-based contracts.

Solution: The SpectraMedix VBP Provider Portal delivers a concise view of value-based payment performance so providers can manage quality, cost, utilization, and risk in relation to one another and contract terms.

5. QUALITY NEEDS

Problem: Providers do not have a concise way to track quality, or quality in relation to key value levers, down to the contract level.

Solution: SpectraMedix value-based payment solutions frames quality relative to risk, cost, provider performance and other value levers down to the contract level.

6. RISK-ADJUSTMENT

Problem: Risk adjustment needs to be optimized for more PMPM.

Solution: SpectraMedix value-based payment solutions ensure members are revalidated for chronic conditions during the performance year to capture full incentives. It tracks wellness visit gaps to close chronic condition revalidation gaps.

7. MONTHLY INCENTIVES

Problem: Payers lack the ability to track incentive gap to goal.

Solution: SpectraMedix provides an advanced solution to track gap to goal both long-term and monthly, empowering payers to pay incentives monthly and track earned and unearned totals and percentages.

8. THIRD-PARTY PORTAL INTEGRATION

Problem: Providers want their value-based payment solutions to integrate with third-party portals without needing to login again.

Solution: SpectraMedix value-based payment solutions easily integrate with third party portals so providers can access quality, risk, cost and utilization analytics in the system they already use.
